William H. Shaw, Asst. Secy., Economic Affairs

BUREAU OF THE CENSUS
A. Ross Eckler, Director

SUMMARY REPORT
FT 986

April 1967

FOR RELEASE
June 14, 1967

CUSTOMS DISTRICT BY CONTINENT

COVERAGE

This report presents statistics on U.S. exports and imports by air in U.S. customs district by continent arrangement. Data have been compiled from Shipper's Export Declarations (Commerce Form 7525-V) and import entries during the regular processing of statistical data on foreign trade shipments. The customs districts shown in this report are those having combined exports and imports by air valued at $2 million or more during the calendar year 1966. A complete list of the customs districts and ports currently in effect appears in the January 1, 1967 edition of Schedule D, Code Classification of United States Customs Districts and Ports.

Exports

These statistics represent exports of domestic and foreign merchandise combined and include government and nongovernment shipments of merchandise by air from the United States to foreign countries. The statistics, therefore, include Department of Defense Military Assistance Program--Grant-Aid shipments, Mutual Security Program economic assistance shipments, and shipments of agricultural commodities under P.L. 480 (The Trade Development and Assistance Act of 1954, as amended) and related laws. Shipments to U.S. Armed Forces and diplomatic missions abroad for their own use are not included in the export statistics. U.S. trade with Puerto Rico and U.S. possessions and trade between U.S. possessions are not included in this report, but exports from Puerto Rico to foreign countries are included as a part of the U.S. export statistics. Merchandise shipped through the United States in transit from one foreign country to another, when documented as such through U.S. Customs, is excluded. (Foreign merchandise that has entered the United States as an import and is subsequently reexported is not treated as intransit merchandise, and is included in this report.) The figures in this report exclude exports of household and personal effects, shipments by mail and parcel post, and shipments of airplanes under their own power.

For security reasons, certain commodities are designated as Special Category commodities, for which security regulations place restrictions upon the export information that may be released. The data shown in this report for individual customs districts and continents exclude exports of Special Category commodities, but overall shipping weight and value totals for Special Category commodities are shown. Further information and a list of Special Category commodities may be obtained from the Bureau of the Census.

The statistics shown for exports to Canada represent fully compiled data for shipments individually valued $2,000 and over combined with estimated data for shipments valued $100-$1,999 based on a 10-percent sample of such shipments. The statistics shown for exports to countries other than Canada represent fully compiled data for shipments individually valued $500 and over combined with estimated data for shipments valued $100-$499 based on a 50-percent sample of such shipments. Effective with the statistics for January 1967, estimated shipping weight and value data are also shown for shipments valued under $100. These estimates are not included in the data shown for individual customs districts.

Since the export figures shown include estimates based on a sample of low-valued shipments, they are subject to some degree of sampling variability. The following is a rough guide to the general level of sampling variability (on a 2 chances out of 3 basis) of value totals. Usually, the higher value figures will have the lower percent sampling errors. Detailed information on the sampling variability of individual figures is available upon request.

UNIVERSITY OF FLORIDA LIBRARIES AUG 1967 BOBBY MEMS DEPT.

For Sale by the Bureau of the Census, Washington, D.C. 20233. Price 10¢ per copy.
Annual subscription (FT 900, 975, 985, and 986 combined) $5.00.

Value totals for "Total" and "North America" of:	Proportion of cells with sampling variability of:				
	under 2%	under 5%	under 10%	under 20%	20% and over
$1,000,000 and over	.60	.85	1.00		
$500,000-$1,000,000	.45	.65	.70	1.00	
$100,000-$500,000		.15	.40	.45	.55
$20,000-$100,000				.25	.75
Cells of under $20,000	Are likely to have sampling variability from $10,000 to $20,000				
Value totals for continents of South America, Europe, Asia, Australia and Oceania, and Africa of:	**Are likely to have sampling variability of:**				
$300,000 and over	Less than 2%				
$100,000-$300,000	Less than 5% with over half of the totals less than 2%				
$20,000-$100,000	Generally less than 10% with over half of the totals less than 5%				
Under $20,000	Generally $1,000 to $2,000				
Cells of $0	Generally less than $500				

The sampling variability of shipping weight figures, in percentage terms, can be approximated by the percent sampling variability of value.

Imports

These statistics represent general imports, which are a combination of imports for immediate consumption and entries into bonded warehouses. The statistics include government as well as nongovernment shipments of merchandise by air from foreign countries to the United States. However, American goods returned by the U.S. Armed Forces for their own use are excluded. U.S. trade with Puerto Rico and with U.S. possessions and trade between U.S. possessions are not included in this report, but imports into Puerto Rico from foreign countries are considered to be U.S. imports and are included. Merchandise shipped through the United States in transit from one foreign country to another, when documented as such through U.S. Customs, is not reported as imports and is excluded from the data shown in this report. (Foreign merchandise that has entered the United States as an import and is subsequently reexported is not treated as intransit merchandise and is included in this report.) Imports of household and personal effects, imports by mail and parcel post, and imports of airplanes under their own power are not included.

The statistics shown for individual customs districts represent fully compiled data for shipments valued $251 and over. Data for shipments valued under $251, reported on formal and informal entries (informal entries generally contain items valued under $251), are estimated from a 5-percent sample, effective January 1967. Prior to January 1967, the estimates were based on a 1-percent sample. Separate shipping weight and value estimates for shipments valued under $251 are shown, effective with the January 1967 statistics. The shipping weight data are estimated from the values on the basis of constants that have been derived from an observation of the value-weight relationships in past periods.

Since the statistics showing total value of imports by all carriers include sample estimates, they are subject to sampling variability. In general, the higher value figures will have the lower percent sampling errors. Value totals of $500,000 and over will generally have a sampling variability of less than 3 percent; value totals of under $500,000 will generally have a sampling variability of less than $50,000.

Table 1. Selected Customs Districts of Lading by Continent

(Data shown represent domestic and foreign merchandise. Shipments of Special Category commodities are excluded from all district and continent data. Estimated shipments valued under $100 are excluded from all district data and data for U.S. flag carriers)
